CAREER OBJECTIVE

Motivated Computer Science graduate with strong knowledge of React, JavaScript, TypeScript, Python, Django, Node.js, Express.js, MongoDB, MySQL and PostgreSQL. Passionate about building scalable full-stack web and mobile applications, REST APIs and user-focused interfaces. Seeking an entry-level React / Full Stack Developer opportunity where I can contribute to frontend and backend development while continuously learning new technologies.

EDUCATION QUALIFICATION

BE in Computer Science Engineering	SKSVM Agadi College of Engineering and Technology, Laxmeshwar (2022–2026) — CGPA: 8.9
PUC	SK Arts and HSK PU Science College, Hubli (2020–2022) — 85.16%
SSLC	Sri Dundi Basaveswar High School, Tadas (2016–2018) — 94.24%

TECHNICAL SKILLS

Programming Languages:	Python, Java (OOPS), C, JavaScript, TypeScript
Frontend:	HTML, CSS, React.js, React Native
Backend:	Node.js, Express.js, Django
Databases:	MongoDB, MySQL, PostgreSQL, Firebase / Firestore
APIs & Tools:	REST APIs, Postman, Git, GitHub, VS Code, pgAdmin, Render

INTERNSHIP EXPERIENCE

Software Development Intern — Bluestock Fintech (Oct 2025 – Nov 2025)

- Developed and maintained backend modules using Node.js and MySQL for company registration and verification.
- Implemented secure user authentication including login, registration and password recovery.
- Tested and validated REST APIs using Postman and collaborated in debugging application issues.
- Integrated frontend applications with backend REST APIs for seamless data communication.

Python Full Stack Developer Intern — Aitch Nu Global Technologies

- Worked on full-stack web development using HTML, CSS, JavaScript, React, Django and MySQL.
- Built projects including Student Portal Dashboard and React Task Manager.
- Performed CRUD operations and database connectivity while gaining experience in frontend, backend and database integration.

PROJECTS

TaskFlow — React Native Task Management App

Technologies: React Native, TypeScript, Firebase Authentication, Firestore, Node.js, Express.js, MongoDB, REST API, Render

- Built a mobile task management application with registration/login, task creation, editing, deletion and task tracking.
- Integrated Firebase Authentication and Firestore with a Node.js/Express backend and MongoDB for task persistence.
- Connected the mobile application to a deployed backend hosted using Render and tested API communication across devices.

Food Search & Recipe App

Technologies: React, Vite, JavaScript, Spoonacular API

- Created a recipe search application with API integration, recipe listing and detailed recipe views.
- Implemented responsive UI and handled API states and duplicate-result rendering.

React API Explorer

Technologies: React, JavaScript, REST APIs

- Built pages/components for Random User, Joke, Weather and Country API integrations.
- Implemented useEffect, event handling, routing and reusable components for API-driven interfaces.

Study Material Website

Technologies: HTML, CSS, Node.js, SQL

- Built a centralized platform for students to access notes, question papers and study resources.

Diabetic Care and Dietary Management System for Type-1

Technologies: PHP, MySQL

- Developed an application to monitor glucose levels and dietary intake with insulin calculation logic using ICR and ISF formulas.

Task Management & PDF Progress Tracker

Technologies: Python, Django, HTML, CSS, JavaScript, MySQL

- Developed a full-stack task manager with CRUD operations, status tracking and PDF upload/reading progress tracking.
- Used Django Admin Panel to manage users, tasks and uploaded documents.

ADDITIONAL DEVELOPMENT

React Router, React Hooks (useEffect, useReducer, Context API), CRUD operations, Firebase authentication, Firestore, MongoDB integration, REST API development/testing, Git/GitHub collaboration, deployment with Render.
